Kansas City

## SKILLS

JavaScript, Express.js, React.js, Redux, Python, Flask, SQLAlchemy, SQL, Git, HTML, CSS, AWS, PostgreSQL, Node.js

## PROJECTS

### FantasyBnB

[FantasyBnB](#) | [Github](#)

*This project is a clone of AirBnB using express.js, react, javascript, and redux*

- Implemented an express.js back end framework to fully optimize the handling of dataflow and the filtering of user input
- Established a React/Redux front end library to maximize the efficiency of dataflow as well as improve the user experience.
- Custom styling was added so the user experience would be pleasant and intuitive.

### Query

[Query](#) | [Github](#)

*This project is a clone of Quora using python, flask, sqlalchemy, javascript, react, and redux*

- Cooperated with 3 of my fellow students to effectively manage and coordinate our actions to achieve the maximum level of productivity and efficiency.
- Oversaw the creation of the Flask/SQLAlchemy back end to optimize the flow of data and communicate effectively with my team so that everyone had a proper understanding of the structure of the data.
- Designed components to handle specific tasks for maximum efficiency as well as the ability to reuse components in multiple areas.

### RememberAll

[RememberAll](#) | [Github](#)

*This project is a clone of Todoist using python, flask, sqlalchemy, javascript, react, and redux*

- Initialized the backend as a Flask/SQLAlchemy framework with optimized data tables to maximize the efficiency of the dataflow.
- Custom styling for every component that constructs an interactive environment to maximize the quality of the user's experience.
- Constructed a React/Redux front end to optimize the user experience and further create an interactive environment for the site.

## EXPERIENCE

### Web Developer

StoneWood Granite, Contract 2023

- Worked alongside a permanent employee to create a web application with an intuitive UI for an image gallery of products that customers could easily navigate.
- Advised the permanent employee on how to maintain the application as well as update any product images for new stock.
- Assembled a multi-screen display and wireless interface for customers to view life-size, hi-definition images of products.

### Legal Assistant

CDL Legal, April 2022 - September 2022

- Responsible for monitoring customers' legal disputes with the Department of Transportation.
- Contacted and reassured each customer that the details of their legal disputes could be handled and provided any supporting information to maximize customer service.
- Managed court dates, lawyer assignment and provided the necessary legal documentation to government entities in order to solve disputes without any unnecessary hardship for the customers.

## EDUCATION

**App Academy** - Immersive software development course with focus on full stack web development (Summer 2023)

**University Missouri @ Kansas City** - Bachelor's of Arts and Science - Political Science (Spring 2016)
